## Nozzle extensions series D 10 needle sealing

The nozzle extensions of the D10 series have a pipe diameter of 10 mm. They give the opportunity to solve application jobs by their small dimensioned construction, especially for the installation in machines or robots because of very low space requirements. Also suitable for spraying into very small moulds or through small holes.

### Nozzle extension model **angled**:

Extension spraying at an angle available in various versions:

- spraying at an angle 45°
- spraying at an angle 90°

Extent of delivery: complete extension

### Nozzle extension model **single horn**:

Extension spraying at an angle available in various versions:

- spraying at an angle 45°
