

Back pressure regulator

schütze
SPRAYTECHNOLOGY

The SCHÜTZE back pressure regulators are used for the manual regulation of liquid pressures in circulation systems. They are installed in the return line and ensure that the pressure in the line is always constant.

The back pressure regulator is available with a regulation range of 0 - 7 bar.

These regulators are manufactured from stainless steel. In this way they are suitable for most of fluids f.i. glues, adhesives, colours, paints, release agents, oils.

The diaphragm is made from Viton[®], resp. the material side of membrane is made from PTFE.

Technical data:

Material:	all parts are made from stainless steel
Membrane:	Viton [®] / PTFE
Gasket material:	Viton [®]
Regulation range:	0 – 7 bar
Gauge:	stainless steel ø 63 mm
Connections:	1/2"

Special designs on request.
Technical alterations reserved.
