

HD-Filter

schütze
SPRAYTECHNOLOGY

The **Schütze-high pressure filter** (HD-filter) is designed for pressures up to 100 bar. This filter must be connected with existing fluid line stationary. The filter element has a mesh size of 0,2mm (200my). The filter housing is made from stainless steel. In this way also aggressive fluids can be filtered.

- Inlet/Outlet: 1/8", 1/4" or 1/2", female or male thread

Technical data:

material pressure:	max. 100 bar
mesh size:	0.2 mm
weight:	3450 g
main body:	stainless steel
measurements:	Ø 70 x 210 mm

Special designs on request.
