SPRAYTECHNOLOGY

S 947-A

S 947-B

S 947-K

S 947-S

The spray guns of the SCHÜTZE series S 947 are the result of the consequent development of the spraying technology.

The modular construction of series S 947 makes it possible to convert each type into another type.

Spray guns of model S 947 are available as:

- S 947-B:** gravity feed cup gun
- S 947-A:** with feed pipe for fluid supply via pressure tank or pump
- S 947-S:** syphon cup gun
- S 947-K:** syphon cup gun with 1 ltr. aluminium cup with bayonet connection

- available nozzle dimensions:
ø 0.3 / 0.5 / 0.8 / 1.0 / 1.2 / 1.3 / 1.4 / 1.5 / 1.7 / 2.0 / 2.5 / 3.0 / 3.5 mm
- particularly fine atomizing of fluids
- nozzle and needle made of high quality stainless steel
- increased output of surface capacity
- easy and fast cleaning of air cap and nozzle
- new, improved design of nozzle set
- atomizing air micrometer integrated
- anodized gun body, easy to clean
- fan adjustment by unemployeed free hand, easy to use
- easy handling
- seals made of PTFE
- also in „HVLP“-technique available (S 947 HVLP)
