

Roundspray-spray gun W2

schütze
SPRAYTECHNOLOGY

The roundspray-spray gun W 2 is the ideal spray gun for miscellaneous small paint jobs.

The roundspray-spray gun W 2 atomizes in a concentric, round and fine sprayjet. This offers a very good application by minimal material-consumption. The very good handling and the low weight of the W 2 avoid early tiredness while spraywork.

The simple construction and the uncomplicated operation of the W 2 is very expedient. Even under tough working conditions it sprays regularly and reliable. The excellent quality and precision guarantee a long and useful life of gun. For spraying horizontal surfaces or spraying upside down a universal joint to swing the cup is available.

For the various viscosities of fluids different nozzle sizes are available. In standard version the W 2 will be equipped with a nozzle of 1,5 mm Ø. This size is suitable for the most nitro-paints, oils and laquers.

- available nozzle dimensions:
ø 0.5 / 0.8 / 1.0 / 1.2 / 1.5 / 1.8 / 2.0 / 2.5 / 3.0 mm
(standard version: 1.5 mm ø)
- cup:
0.3 ltr. aluminium
