

**AIRLESS-spray gun
S 720/KL Extrusion**

schütze
SPRAYTECHNOLOGY

The spray gun S 720/KL is an extrusion gun (without atomizing the material). It is designed for bead pattern application of glues and other high viscosity fluids.

The following further advantages of AIRLESS-spray guns of series S 720 were realized:

- robust construction
- ergonomic design for comfortable handling
- long trigger for optimal leverage
- reliable seat unit for durable use under hardest conditions
- mechanics without any problems

Safety measures:

- trigger lock
- trigger guard

Standard version:

- swivel 1/4"
- tool

Technical data:

Weight:	approx. 700 g
Material pressure:	max. 50 bar
Gun body:	aluminium, chemically nickel plated
Nozzle:	stainless steel
Needle:	stainless steel

Special designs on request.
Technical alterations reserved.
