paint changing unit

The paint changing unit can handle one medium or switch between several media (depending on the version). It also has an extra connection for a flushing agent, which is used to clean the pipeline prior to each medium change. The valves are each controlled by an external 5/2 way valve (not included with delivery).

The paint changing unit is available in a wide range of versions.

Standard versions: 1 / 2 / 3 / 4 / 5 / 6-fold

Other versions are available on request!

Technical data:

Dimensions:	350 x 165 x 68.5 mm
Control air pressure:	5 - 6 bar
Material pressure:	max. 10 bar
Weight:	approx. 5.5 kg (6-fold)
