

Air Distributor

schütze
SPRAYTECHNOLOGY

The SCHÜTZE air distributors are designed for the distribution of compressed air to several spray valves or spray guns.

Different connections for various hoses are available. Also there is the possibility to use shut-off valves to block single outputs.

By default the air distributor can handle up to 8 bar. Versions with 4, 6 or 8 outputs are available.

Special versions are available on request.

Special designs on request.
Technical alterations reserved.
